THE URBAN ELECTRIC CO.

**JEI Design**  
 Lighting is one of JEI Design's favorite things to select for a home. While design can become mundane as people tend to repeat trends, lighting offers a fun way to mix up a space and has the ability to change the entire atmosphere of a room. This Urban Electric fixture, for example, is so stunning and distinctive that an entire space could be designed around it. JEI Design incorporates unique and bespoke lighting into their designs, bringing high end spaces to life. **Culp Associates**

The Corsia Console by David Izzetta is built by hand from cold rolled steel and Douglas Fir. Tension and interplay is created between the smooth refined base and rustic top as well as through the juxtaposition of warm and cool-toned finishes in equal balance. **Culp Associates DALLAS, 1025 N.
